H. NITHIKESH

Chennai, TN | +91 9840031608 | nithikesh713@gmail.com
LinkedIn : https://www.linkedin.com/in/nithikesh16 | GitHub : https://github.com/Nithikesh-713

SUMMARY

- Entry-level Full Stack Developer skilled in MERN stack with hands-on experience building CRUD applications and responsive web projects. Strong foundation in JavaScript, React.js, Node.js, and MongoDB, with real-world project exposure and professional experience at cognizant in a data operations role.

TECHNICAL SKILLS

- Languages : JavaScript (ES6), Python
- Frontend: HTML5, CSS3, React.js, Responsive Design
- Backend: JSON, REST APIs
- Databases: MongoDB, MySQL
- Tools: Git, GitHub, Visual Studio Code, Chatgpt, Copilot, Perplexity, Cursor, Google Gemini

EDUCATION

Kamaraj College of Engineering and Technology **Virudhunagar, TN**
Bachelor of Engineering in Electronics and Communications Engineering ***Aug 2020 - Apr 2024***

- CGPA : 7.9

WORK EXPERIENCE

Cognizant **Chennai,TN**
Process Executive - Data **17/01/2025 - 28/11/2025**

- Extracted and analyzed employee performance data using ProHance application, performed data validation, and prepared accurate reports for business and management teams.
- Extracted, analyzed, and validated employee performance data using the ProHance application
- prepared accurate business reports and delivered actionable data insights to management teams.

PROJECTS

MongoDB CRUD Application **10/2024**

- Developed a CRUD web application using Node.js, Express, and MongoDB, enabling users to add, remove, and update user data, showcasing CRUD capabilities for integration in future projects.

Calculator Web Application (https://tinyurl.com/nithikesh-calculator) **10/2024**

- Built a responsive web calculator using HTML, CSS, and JavaScript, enabling users to perform arithmetic operations.

Door Status Monitoring with Telegram Notification **09/2023**

- Developed a real-time door monitoring system with an Arduino UNO, an ESP32 microcontroller and magnetic door sensor, detecting door open/close events and relaying data instantly.
- Integrated the Telegram API and bot functionality to send immediate notifications to users' devices, enhancing real-time awareness and security.

Automatic medicine dispensing robot **04/2023**

- Created an autonomous indoor medicine dispensing robot with obstacle detection using an ultrasonic sensor, enabling safe and reliable medication delivery.
- Built the system using Arduino UNO, L298N motor driver, Node MCU, servo motor, DC geared motors, and a stable power supply, ensuring precise control and consistent performance.

CERTIFICATIONS

- Full Stack Development course in the MERN stack (MongoDB, Express, React.js, Node.js) at Elysium Academy, Madurai.
- NPTEL courses in Soft Skills, Digital System Design, and Introduction of Things.
